Our Company

The brainchild of Mr. Sanjit Prakash, Shree Sai Plast Pvt. Ltd. was founded in the year 1994-95 in Jehanabad, Patna. With continuous hard work and the incorporation of modern technologies, the company started bearing the fruits of success, after which the company shifted base and moved to Shipara, Patna where new land was bought for building a bigger office. A company which only believes in quality and customer satisfaction, Shree Sai Plast Pvt. Ltd. has emerged as one of the top most manufacturers of plastic pipes, which caters to diverse industries. The company processes over 15000 tonnes of polymers annually and this is likely to exceed 100000 tonnes by the year 2021. At present, the company has a turnover of crores and is one of the largest polymer convertors in the country and this is only due to every employee's unwavering dedication and passion.

One-stop Solution

From residential to agricultural, Shree Sai Plast Pvt. Ltd. provides piping solutions to a myriad of industries. Our portfolio of products has 5000 diverse products, which includes plastic piping products, material handling products, protective packaging products, plastic piping products and similar others. No matter if you have water management, plumbing, sewage, drainage, sewerage or sanitation needs, Shree Sai Plast Pvt. Ltd. is the one-stop solution for all your plumbing needs. According to different needs, we prepare and design different types of pipes, ensuring you the perfect fit for your needs.

Our Pipping Divisions

Our main 8 categories of pipes that we predominantly manufacture are as follows:

- SWR Pipes (Fittings coming soon)
- UPVC Pipes
- Plumbing Pipes
- Agricultural Pipes
- Rigid Pipes
- Column Pipes
- Ribbed Strainer
- CPVC Pipes (Upcoming)

1

SWR Pipes & Fittings

UNBREAKABLE, NO BLOCKAGE, NO LEAKAGE

SWR stands for Soil, Waste and Rainwater. Providing the ultimate solution for the discharge of soil, waste, and rainwater, they are 100% leak-proof and are available in different shapes, sizes and colours.

Features & Benefits:

- Free from scale formation & rusting
- Free from weathering & chemical action
- Virtually immune to attacks against fungi, bacteria, micro-organisms & insects

UPVC Casing Pipes

2

COMPLETE SOLUTION FOR BORE-WELL SECTOR

Mostly used for drinking water supply lines, covering tube works and similar others, Unplasticized Polyvinyl Chloride or UPVC pipes are eco-friendly and chemical resistant. Extremely lightweight, these pipes are durable, resilient and are used by many owing to their low maintenance.

Features & Benefits:

- Excellent corrosion resistant
- Unlike steel pipes, these pipes offer good resistance to aggressive elements in the soil which could cause encrustation of well screens
- Made of non-toxic materials
- Available in wide varieties for different requirements in the bore-well sector

3

Plumbing Pipes

Predominantly used for residential purposes, like for supply of water in buildings, plumbing pipes are of various types like CPVC, PVC and PEX. Offering the best plumbing fittings and pipes, Shree Sai Plast Pvt. Ltd. offers you with a plethora of options to choose from.

Agricultural Pipes

4

Agricultural pipes are slotted PVC pipes which are placed into a trench that is backfilled with rocks or sand. One side of these pipes are self-socketed while the other ends are plain. The purpose of these pipes is to drain away any water that is in the ground.

Usually made of plain concrete, vitrified clay, cast iron and other strong materials, rigid pipes are sufficiently strong to withstand most anticipated loads and have sufficient strength to support loads even if no side support is provided.

Designed using latest technology, column pipes by Shree Sai Plast Pvt. Ltd. can withstand heavy handling and are known for their UV resistance and lower thermal conductivity. Crafted to deliver excellent performance, these pipes are manufactured using the best quality raw materials.

7

Ribbed Strainer

Ribbed strainer pipes work as casing pipes and are built in a way that they can bear the load deep under a well without allowing any particles to pass through them. The name strainer is appropriate as it works effectively as a perfect filter.

CPVC Pipes (Upcoming)

8

Chlorinated Polyvinyl Chloride or CPVC pipes are made of strong, durable materials and have been successfully used in plumbing applications around the world for more than 50 years. Known for its quick and convenient installation, these pipes are best used for residential plumbing problems.
